Digital Storytelling Planner

NAME _____ DATE _____

1. Your story

Your story needs three sprites: a storyteller who starts the story, and two sprites the player can click to choose.

Who are your characters?

STORYTELLER SPRITE	CHOICE ONE SPRITE	CHOICE TWO SPRITE

What will happen in your story? _____

What choice will the player make? _____

2. Name your backdrops

These are the names you'll pick in your blocks.

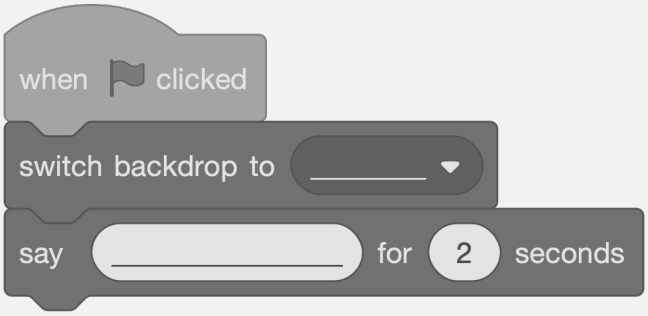

Title: _____ Path one: _____ Path two: _____

3. Plan the two paths

	CHOICE ONE	CHOICE TWO
Message it broadcasts		
What happens		
How it ends		

4. Build the scripts

Storyteller sprite: start the story. Fill in the blanks with your names.

Choice one sprite: send its message when clicked. Choice two is the same, with its own message.

Path one: runs when its message arrives. Path two is the same, with its own message, backdrop and ending.

Then add `show` and `hide` so each sprite is on the stage only in its own part of the story.

5. Test both paths

Play from the green flag, once for each choice. Matches my plan? Choice one _____ Choice two _____
