Unit 1 Review

Every block on this sheet is one you have used in Unit 1. Look here when you forget how a block works, then use it your own way. Test as you build: click the green flag, play every path, and fix one thing at a time.

1. Blocks run in order

Blocks run top to bottom. Swap two blocks and the sprite ends up somewhere else.

2. Green flag, say, and think

This script starts when the green flag is clicked. `say` makes a speech bubble and `think` makes a thought bubble. A plain `say []` with no seconds stays up until the sprite says something else.

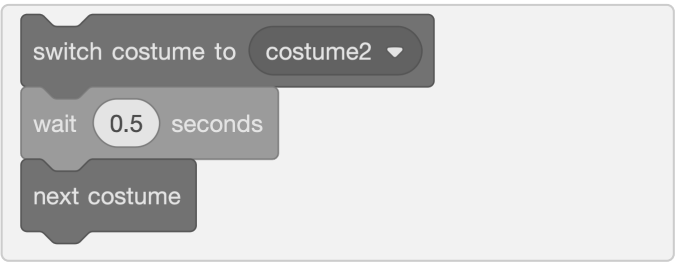

3. Take turns with wait

Every green flag script starts at the same moment, so a sprite that talks second has to wait first.

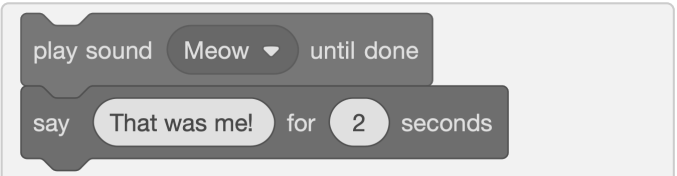

4. Costumes

`switch costume to` picks one costume. `next costume` moves to the next one in the list.

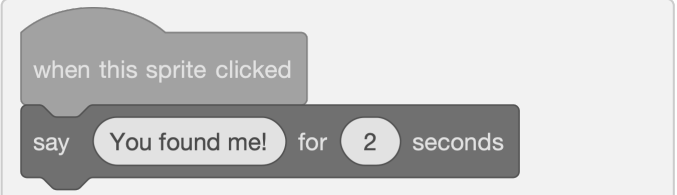

5. Sounds

`start sound` plays and moves on right away. `play sound until done` finishes the sound before the next block runs.

6. Click a sprite

This script runs every time the sprite is clicked. `when key pressed` works the same way for a key.

7. Move to a spot

`go to` jumps to a spot on the stage. `glide` slides there in that many seconds.

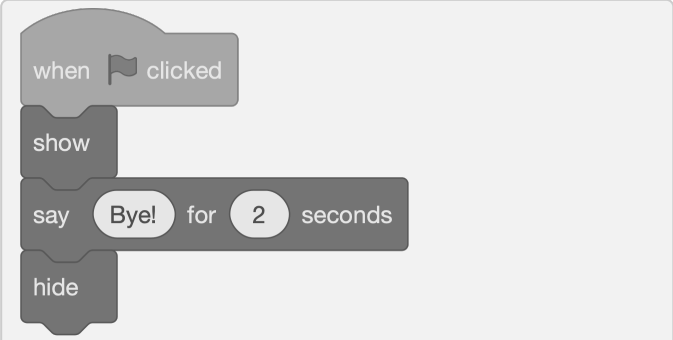

8. Repeat

`repeat` runs the blocks inside it that many times. Only the blocks inside the loop repeat.

9. Show and hide

A script that ends with `hide` needs `show` near the top, or the sprite stays invisible the next time.

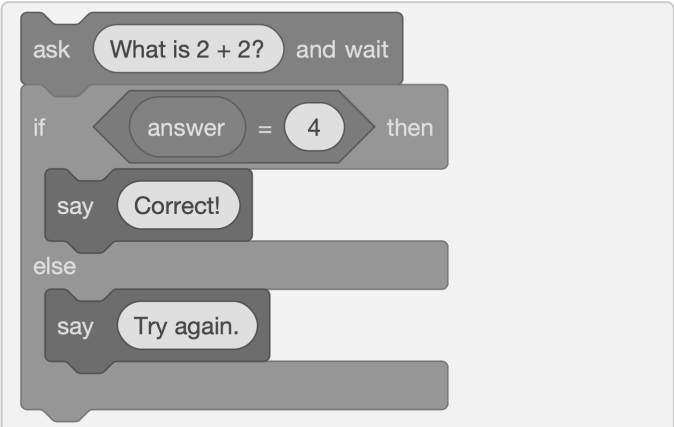

10. Backdrops

Switch to your first backdrop on the green flag, so every run starts in the same place. Give backdrops names you can find later.

11. Ask a question and check the answer

`answer` holds what the player typed. `if else` picks one of two paths.

12. Send a message with broadcast

`broadcast` sends a message to every sprite. `when I receive` runs when that message arrives. The names must match.
