Digital Storytelling Planner

NAME _____ DATE _____

> Plan your story on paper first. Then building it is mostly copying from this page.

1. Your story

My story is about: _____

Opening line (it tells the player how to choose): _____

2. Name your backdrops

These are the names you'll pick in your blocks.

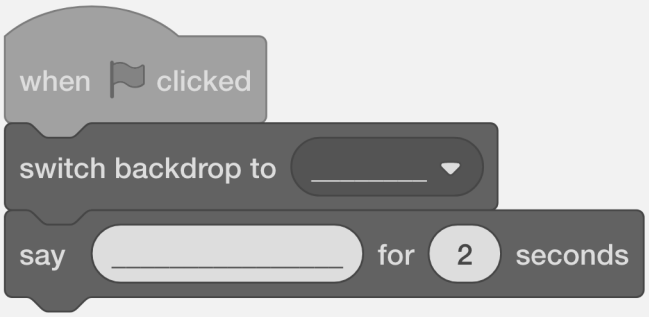

TITLE BACKDROP	PATH ONE BACKDROP	PATH TWO BACKDROP

3. Plan the two paths

	CHOICE ONE	CHOICE TWO
Sprite the player clicks		
Message it broadcasts		
What happens		
How it ends		

4. Build the scripts

Storyteller sprite: start the story. Fill in the blanks with your names.

Choice one sprite: send its message when clicked. Choice two is the same, with its own message.

Path one: runs when its message arrives. Path two is the same, with its own message, backdrop and ending.

Then add `show` and `hide` so each sprite is on the stage only in its own part of the story.

5. Test both paths

Play from the green flag, once for each choice. Matches my plan? Choice one _____ Choice two _____
