Arcade Classic Planner

NAME _____ DATE _____

1. Your game

The starter has two sprites: the **Parrot**, which the player controls, and the **Pipe**, which the player must avoid. You can change their costumes. What will they look like?

THE PLAYER (PARROT SPRITE)	THE THING TO AVOID (PIPE SPRITE)

Title: _____

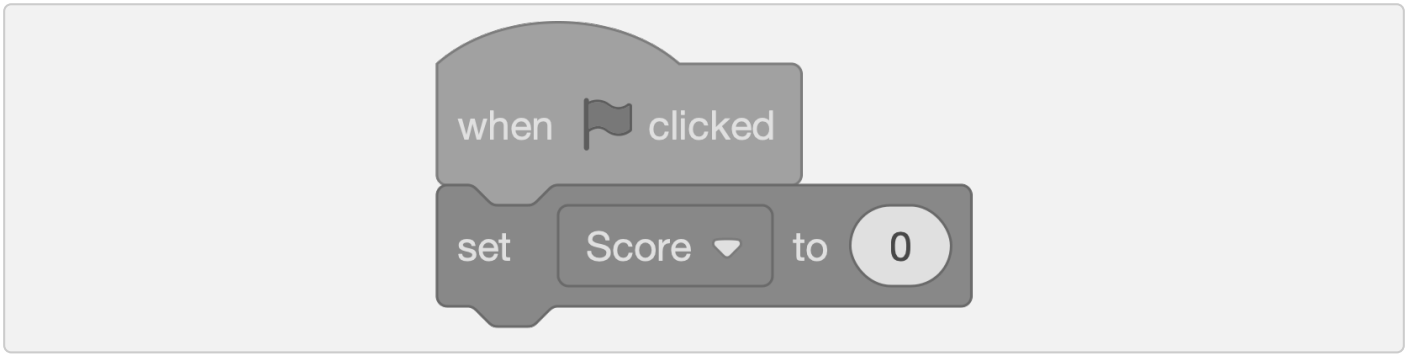

Directions for a new player: _____

2. Plan the rules

	WHAT SHOULD THE GAME DO?
The green flag is clicked	
The player earns a point	
The Parrot touches the Pipe	

3. Build the scripts

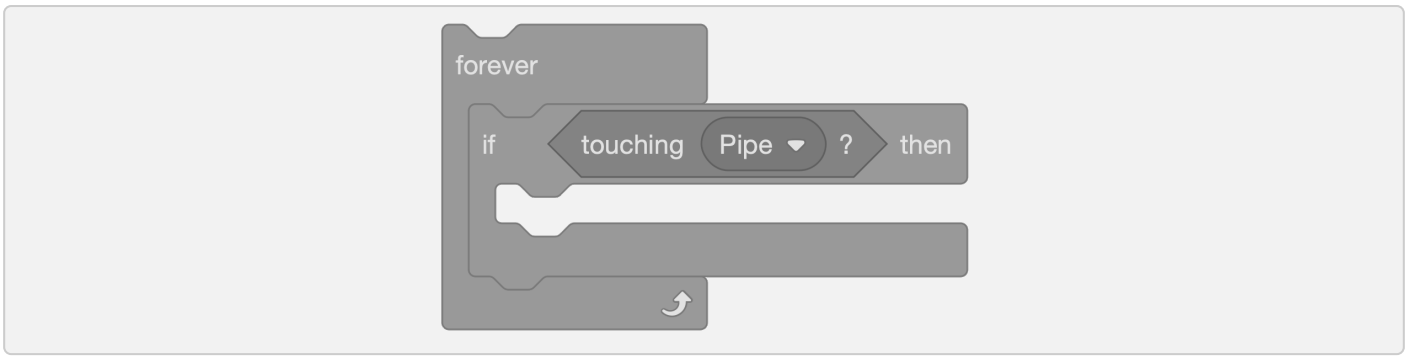

Score starts at 0. Make a variable called `Score`. Then add this script to the Parrot.

Score goes up. In the Pipe's `forever` loop, `set x to (240)` sends the Pipe back after it passes the Parrot. One way to score: add `change` right under it.

Game over. In the Parrot, a `forever` loop keeps checking for the Pipe. Put an ending inside the `if`.

My ending blocks: _____

4. Test it

Play from the green flag. Score starts at 0? _____ Goes up by 1? _____ Game ends? _____
